DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1- 8 are rejected under 35 U.S.C. 102(a) as being anticipated by Beerling et al. (6,592,205).

Beerling et al teach a page-width print head comprising:

Claims 1-8:

- a substrate of nozzle arrangements that is positioned on a substrate and the arrangements are in fluid communication with ink inlet channels (figure 9 teaches substrate 301 upon which a plurality of nozzle arrangements 205 are disposed, each arrangement 205 comprising rows of nozzles as seen in figure 2, and each arrangement 205 is in fluid communication with ink inlets or ducts 113 of figure 9 or ink feed channel 413 of figure 4)

The limitations of the arrangements being the product of an integrated circuit fabrication process and a pattern which is the result of carrying out successive replications of one nozzle arrangement with predetermined rotations and multipliers on a reference grid do not establish any structural limitations other

than nozzle arrangements on a substrate and are in communication with some ink channels. The same can be said for claims 2-8.

Allowable Subject Matter

Claims 9-16 are allowed.

The following is an examiner's statement of reasons for allowance:

* The primary reasons for allowance for claims 9-16 are the inclusion of the limitations of a method of fabricating printhead comprising the steps of forming a unit cell on a reference grid, the unit cell representing a nozzle arrangement to be fabricated on a substrate, carrying out successive replications on the unit cell with predetermined rotations and multipliers to form a plurality of unit cells on the reference grid. It is these limitations either alone or combined as claimed that have not been taught, found, or suggested by prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
